	Major order actions, March	22

Highlights

MARCH 1967

<u>Producer Deliveries</u>. A total of 127,786 producers delivered 4.2 billion pounds of milk to regulated handlers in 68 comparable markets during March 1967. This represents a decrease of 1.4 percent under producer deliveries in March 1966. Average daily delivery per producer increased from 1,018 pounds in March 1966 to 1,052 pounds in March of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 3.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 68 markets decreased 3.0 percent from last year, to a total of 2.7 billion pounds for the month of March 1967. The average utilization percentage for March was 66 percent, down from 67 percent last year. Fourteen markets showed an increase in the utilization percentage, 8 showed no change, and the remaining 46 markets showed a decrease (See table 4).

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, decreased 2.6 percent in the 68 markets for the month of March.

Minimum Prices. The weighted average Class I price paid by handlers in the 68 markets for 3.5 percent milk was \$5.79 per hundredweight, 41 cents higher than the \$5.38 per hundredweight price in March 1966. Minimum Class I prices for March were higher in all 68 markets.

Producers in the 68 markets received a weighted average blend price of \$5.14 per hundredweight for 3.5 percent milk. This is 37 cents higher than the March 1966 blend price of \$4.77. Producers received higher blend prices in all 68 markets. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

<u>Fluid Milk Sales</u>. Total in-area fluid milk sales for March 1967 in 67 marketing areas are estimated to be about 2.2 billion pounds, 1.1 percent below such sales in March of last year. Complete February in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 6.

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-March period for the 68 markets was \$5.92, 56 cents higher than the \$5.36 price in 1966. The 1967 weighted average blend price was \$5.26, 50 cents higher than the blend price of \$4.76 reported for this period in 1966 (see table 2).

<u>Producer Deliveries and Deliveries Used in Class I.</u> Milk deliveries and deliveries used in Class I are reported for individual markets on table 5. In the first three months of this year, compared to the same period in 1966, producer deliveries for the 68 markets were up 0.8 percent, and deliveries used in Class I were down 2.2 percent. Data for the 68 markets and for all markets are summarized below:

Producer Milk	Deliveries ar	d Deliveries	Used in	n Class I,	January-March

^{1/} Markets under regulation on January 1, 1966, and which have had no significant marketing area expansions. Excludes Upper Florida, Milwaukee, Southern Illinois, Central Illinois, and Sioux City.

2/ Class I plus Class II = 477,201 thousand pounds in 1967 and 550,427 in 1966; utilization = 48% in 1967 and 52% in 1966.

3/ Handlers regulated prior to the termination of the Chicago order, 71,157 thousand pounds.

^{3/} handlers regulated prior to the termination of the Unicago order, //
4/ Fewer than three handlers.
5/ Adjusted for duplication due to intermarket transfer.
6/ Excludes Sioux City.
7/ Excludes 213,901 thousand pounds regulated under the Chicago order.

MAJOR ORDER ACTIONS, MARCH 1967

Amendments:

Knoxville - March 1 (32 FR 3337, 2/28/67). Marketing area expanded to include the counties of Campbell, Cocke, Cumberland, Grainger, Hamblen, Jefferson, Loudon, Morgan, Roane, Scott, Sevier, and Union, Tennessee, and the unregulated portions of Anderson and Blount Counties, Tennessee. Population (1960 Census) 630,988.

Order defines a producer-handler as any person who operates, as his personal enterprise and at his personal risk, a dairy farm and a distributing plant and who receives no fluid milk products from other dairy farmers or from sources other than pool plants. Amendment permits a handler or a cooperative association to divert, during the months of September through February, 35 percent of a producer's milk if at least 4 days' production of the producer is received at pool plants in the current or immediately preceding month.

Action removes the Midwest Condensery price series as one of the alternatives in the Class II price formula. The Class I butterfat differential changed from .13 times the Chicago 92-score butter price for the preceding month to .12 times the Chicago 92-score butter price for the current month. The producer butterfat differential changed from .12 times the Chicago 92-score butter price to a weighted average of the Class I and Class II differentials.

New York-New Jersey - March 1 (32 FR 3384, 3/1/67). Action amends the procedure for computing the Class I utilization percentage by adding to the Class I-A and I-B volume the amount of the increase in volume of skim milk subject to the fluid skim differential over that of the previous year (which reflects the volume of skim milk used in standardization).

Rio Grande Valley - March 1 (32 FR 3385, 3/1/67). A "cooperative standby pool plant" operated by a cooperative association and located within the marketing area would qualify for pooling if at least 50 percent of its producer member milk is delivered directly or transferred by the association to pool plants of other handlers.

Amendment action continues indefinitely the present Class I price which was due to expire at the end of February 1967 and retains, through August 1968, the credit on specified Class II milk uses. The maximum administrative assessment rate is increased from four cents to five cents.

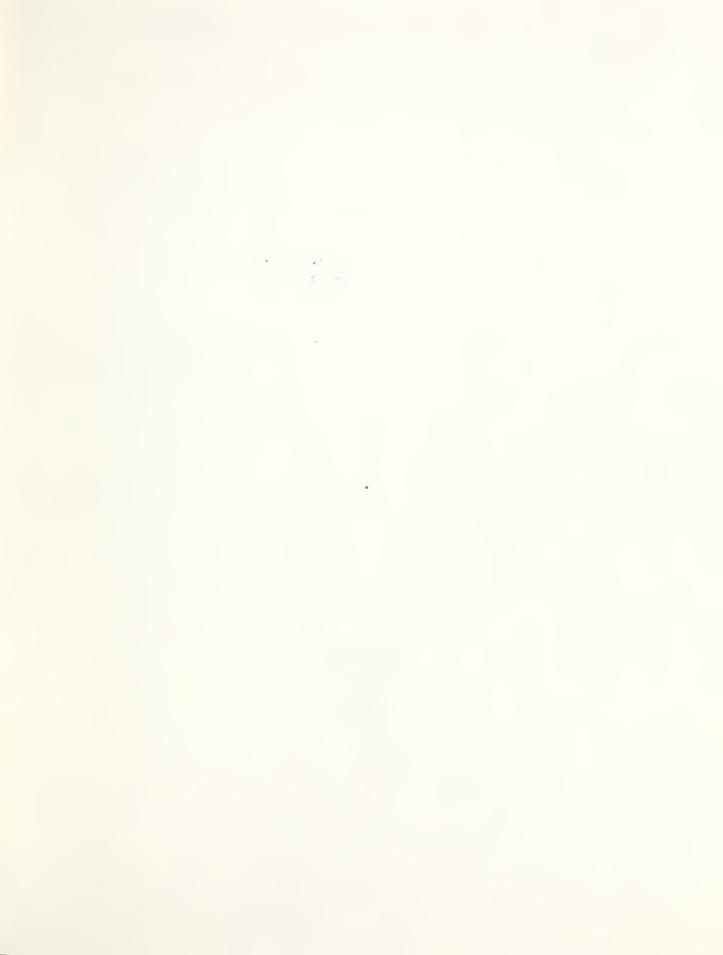

Suspensions:

Connecticut - March 10 (32 FR 4113, 3/10/67). This action will require handlers to pay the farm location differential monies into the producer-settlement fund. By order of the court, each nearby producer will then be paid that portion of his contribution to the total nearby differential monies which does not exceed the amount of such money which he would receive under the Connecticut order without this suspension and the remainder would be escrowed pending the outcome of the litigation and further order of the court.

Western Colorado - March 14 (32 FR 4016, 3/14/67). Action suspends for the months of February through April 1967 that part of the diversion provisions under which the milk of cooperative association members must be received at distributing pool plants for at least five days during the month as a condition for diverting it.

Determination:

Delaware Valley - March 2 (32 FR 3813, 3/8/67). The determination replaces the now discontinued weekly wholesale price index with the monthly wholesale price index for use in the Class I price formula. Determination also changes the index conversion factor from 0.99614 to 0.99712.
